

BRUNO RAMOS

VICE PRESIDENT LANGE MECHANICAL SERVICES

PROFESSIONAL PROFILE

Bruno has 20 years of experience in the services industry with a focus on Energy and a Bachelor's degree in Mechanical Engineering from the University of Texas at Austin.

He began his career as an intern for Houston Lightning and Power at the P.H. Robinson Power Plant in Bacliff, TX. Bruno would later go onto to work for Turbine Air Systems (TAS) implementing their patented Turbine Inlet Cooling technology in several global projects.

During his time at TAS, Bruno was on the team which delivered a 5MW Combined Heating and Power (CHP) plant to BP Helios Plaza in Houston, TX. Because of this, BP is able to claim the first LEED Platinum building in Houston.

He was also an account executive and later promoted to general manager for The Way Companies. Here he led the industrial team to secure full-service maintenance agreements with Goodyear Tire & Rubber Company, Ashland Chemical, DSM Nutritional and Kinder Morgan.

His solid performance record and experience led him to take over operations at Lange Mechanical Services (LMS) as Vice President. Bruno leads the effort to build on LMS's rich history of mechanical services offerings.
